

		Sprint Retrospective		
	What went well	What went poorly	What ideas do you have	How should we take action
	<i>This section highlights the successes and positive outcomes from the sprint. It helps the team recognize achievements and identify practices that should be continued.</i>	<i>This section identifies the challenges, roadblocks, or failures encountered during the sprint. It helps pinpoint areas that need improvement or change.</i>	<i>This section is for brainstorming new approaches, tools, or strategies to enhance the team's efficiency, productivity, or project outcomes.</i>	<i>This section outlines specific steps or solutions to address the issues and implement the ideas discussed, ensuring continuous improvement in future sprints.</i>
	User Authentication and Study To-Do List were successfully implemented.	Some features needed rework due to evolving requirements.	Expect mid-sprint adjustments and plan accordingly.	Set stricter deadlines for finalizing requirements.
	Communication and coordination improved efficiency.	The task was left pending, delaying improvements for mobile users.	Ensure user stories are well-defined before sprint kickoff.	Ensure backlog items are clearly defined and estimated.
	Pages load faster, improving user experience.	Insufficient testers caused last-minute rushes.	Ensure responsive design and smooth user experience.	Prevent repeated delays.
	Performance and security tests passed for core features.	Unexpected challenges in external API implementation.	Avoid integration issues by reviewing external API constraints earlier.	Schedule API testing in earlier sprint stages
	Critical issues were identified and fixed before release.	Performance tuning was done late, leading to extra work.	Identify and fix slow-loading pages before they become a problem.	Optimize system performance proactively.
